BAR TAB

If you wish to provide drinks on a bar tab for your guests you can with either a 'consumption' tab or 'limited' tab. Organizers are welcome to limit the products that can be added to a bar tab.

Consumption Tabs

A consumption bar tab has no monetary limit and will continue to be active until either the organizer requests it to end or the booking ends.

Limited Tabs

The organizer sets a monetary limit for the bar tab and the tab will not be able to exceed this unless the organizer requests it.

Arrival Drinks

If you wish to provide your guests with arrival drinks you can, and we have special drink tokens for this. We recommend the organizer hand these out to the guests for them to then redeem them at the bar for arrival drinks. The organizer determines what the tokens are redeemable for.

CASH BAR

[private functions only]

Meeting a minimum spend with a cash bar is only possible in private functions and not for rooftop booth bookings.

In a private function, your guests can make their own drinks purchases and this can be tracked and contribute to your minimum spend.

If the guests do not spend enough and the overall spend is below the minimum spend, the organizer must pay the difference as room hire.
